COMPONENTS (REMOVAL)

	PROCEDURE	PART NAME CODE	!		\$
1	CAMSHAFT POSITION SENSOR (for Intake Side)	11102A	INFO	-	-
2	CAMSHAFT POSITION SENSOR (for Exhaust Side)	11102A	INFO	-	-

Non-reusable part	*	Precoated part

PROCEDURE

1. REMOVE CAMSHAFT POSITION SENSOR (for Intake Side)

- (1) Disconnect the camshaft position sensor connector.
- (2) Using an 8 mm socket wrench, remove the bolt and camshaft position sensor from the cylinder head cover sub-assembly.

NOTICE:

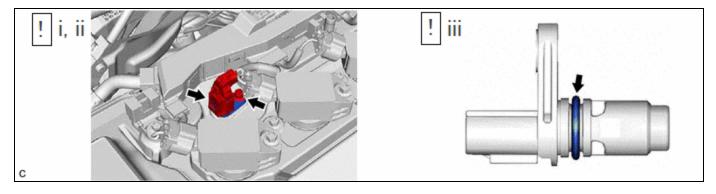

If the camshaft position sensor has been struck or dropped, replace it.

- (3) Perform this procedure only when reusing the camshaft position sensor.
 - 1. Remove the O-ring from the camshaft position sensor.

NOTICE:

- Make sure to only remove the O-ring with bare hands.
- When removing the O-ring, be careful not to damage the O-ring groove of the camshaft position sensor.
- If the O-ring groove of the camshaft position sensor is damaged, replace the camshaft position sensor with a new one.

2. REMOVE CAMSHAFT POSITION SENSOR (for Exhaust Side)

- (1) Disconnect the camshaft position sensor connector.
- (2) Using an 8 mm socket wrench, remove the bolt and camshaft position sensor from the cylinder head cover sub-assembly.

NOTICE:

If the camshaft position sensor has been struck or dropped, replace it.

- (3) Perform this procedure only when reusing the camshaft position sensor.
 - 1. Remove the O-ring from the camshaft position sensor.

NOTICE:

- Make sure to only remove the O-ring with bare hands.
- When removing the O-ring, be careful not to damage the O-ring groove of the camshaft position sensor.
- If the O-ring groove of the camshaft position sensor is damaged, replace the camshaft position sensor with a new one.
