Title: DOOR / HATCH: BACK DOOR WEATHERSTRIP: INSTALLATION; 2023 - 2024 MY Prius Prius Prime [12/2022 -]		

INSTALLATION

CAUTION / NOTICE / HINT

COMPONENTS (INSTALLATION)

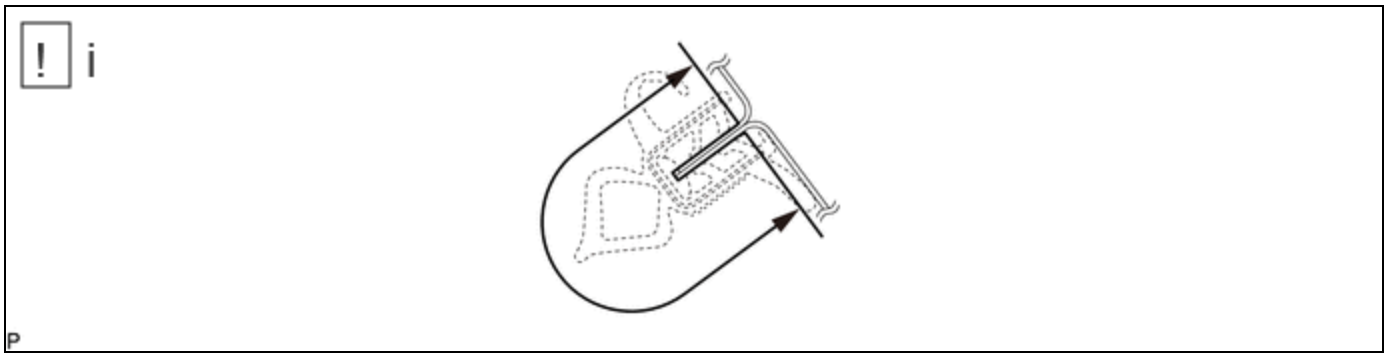

PROCEDURE		PART NAME CODE			
1	BACK DOOR WEATHERSTRIP	67881A	INFO	-	-

•	Non-reusable part	-	-
---	-------------------	---	---

PROCEDURE

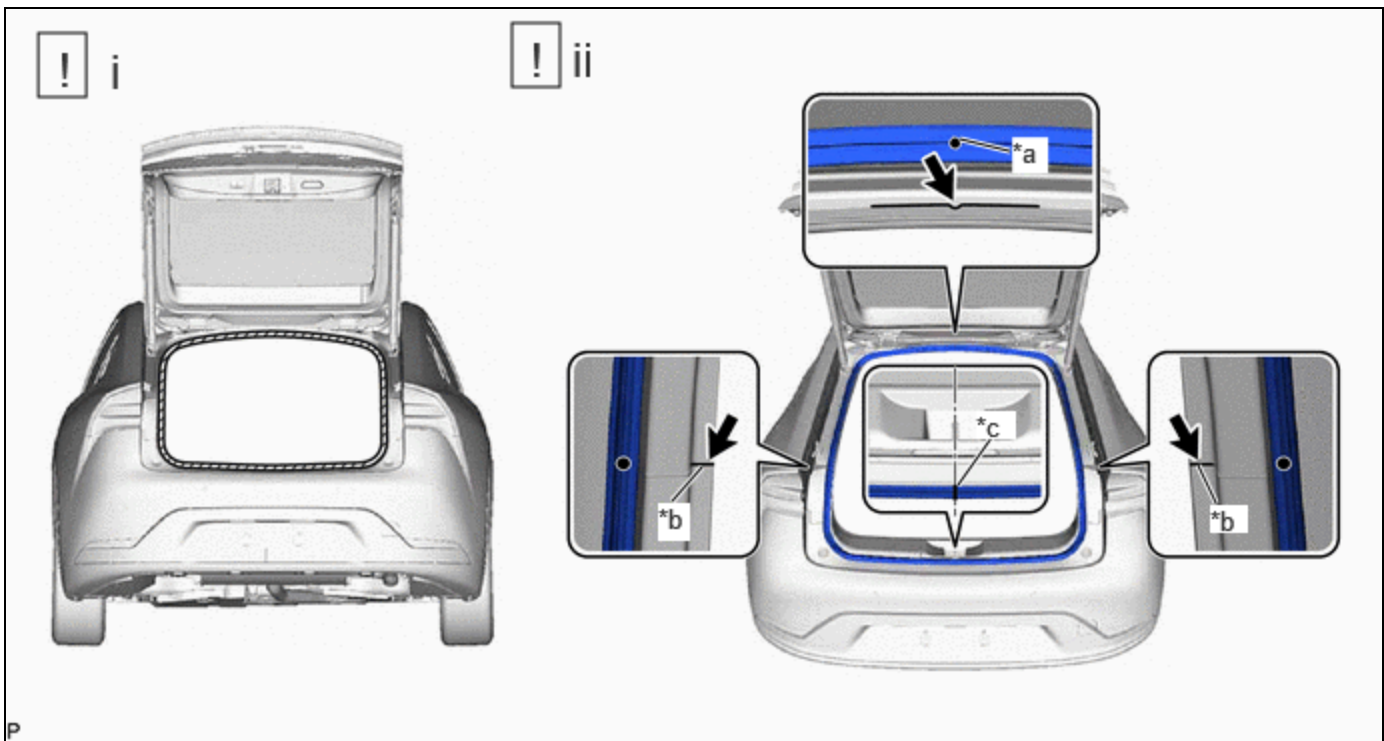

1. INSTALL BACK DOOR WEATHERSTRIP

(1) Make sure to remove any non-drying sealant from the vehicle body.

NOTICE:

If there is any non-drying sealant remaining on the vehicle body, the back door weatherstrip may not be able to be securely installed and may fall off. Make sure to completely remove the non-drying sealant from both the interior side and exterior side installation surfaces on the vehicle body.

*a	Paint Mark (White)	*b	Paint Mark (Sky Blue)
*c	Joint	-	-
	Cleaning Area		Flange Position

- (1) Align the joint of a new back door weatherstrip with the back door lock striker and temporarily install the back door weatherstrip.
- (2) Align the paint marks on the back door weatherstrip with the flange on the vehicle body indicated by the arrow, and install the back door weatherstrip.

NOTICE:

- Make sure to position the paint mark correctly during installation. Failure to do so may lead to water ingress.
- After installation, check that the corners fit correctly.

HINT:

Make sure to install the parts of the back door weatherstrip near the joint and paint mark shown in the illustration first, and then install the corners.
